Re: New Feature Introduction – RoHS Compliant Wire Rope and Compact Rope Isolators

ITT Enidine would like to take this opportunity to introduce RoHS Compliant Wire Rope and Compact Rope Isolators as a standard product offering. We are excited about this upgraded product as it is a more environmentally friendly product that meets the current RoHS Compliance standards. This new enhancement aligns with ITT Enidine’s core values and environmental responsibilities.

Products and features included:

- RoHS Compliant Finish on 6061-T6 Aluminium Mount Bars.
 - ❖ Bar color will change from Gold (Non RoHS) to Silver (RoHS). See page 2 for color example.
- Part numbers and functionality remain the same.
- 302/304 Stainless Steel Wire Rope.
- Hardware Stainless Steel thread insert option for WR2 to WR8.
- Hardware Alloy Steel Zinc Plated for WR12 to WR40.
- There is NO price increase for RoHS Compliance standard products in 2020.

Product Launch Schedule:

- From today through May 31, 2020 shipments could have Non RoHS and RoHS Compliant Product. Individual Units will be either Non RoHS or RoHS (not mixed), However, orders of the same model may have Non RoHS or RoHS (example – order 50 pcs you may receive 20 pcs Non RoHS and 30 pcs RoHS) unless specifically specified on purchase order up until June 1, 2020. For non-mixed order requests prior to June 1, 2020 lead-times will need to be quoted.
- Through May 31, 2020 Enidine reserves the right to ship completed orders as Non RoHS and RoHS.
- June 1, 2020 full RoHS Compliance Standard Wire Rope Isolator Products will be shipped as the standard.

At the inception, and throughout this product development, our global customers have been our first priority. We have taken the most popular product requests and molded them into our product offerings, enabling us to provide a standard product for as many applications as possible.

We thank you for your business and if you have any questions please contact ITT Enidine.

Sincerely,

Brad Griffin
ITT Enidine Product Manager
