

FLEX-LOC

DESCRIPTION

A flexible fixing resistant to oils, the majority of solvents and ageing.

OPERATION

The design of the FLEX-LOC mount gives the following basic characteristics :

- the rubber works in :
 - compression (axial);
 - shear (radial);
 - compression/shear according to the fixing method.

Advantages

- 80% reduction at 150 Hz of vibrational energy transmitted from normal structural frequencies.
- Simple and economical.
- Simple to fix.
- Light weight.

APPLICATIONS

FLEX-LOC are suitable for the fixing of sheets, frameworks, engines, ventilators, electronic equipment, computers, etc.

They have, moreover, a function of insulation against the structure borne noises, unlike other fasteners.

DIMENSIONS

Paulstra reference	Barry Control reference	Nut	Ø A (mm)	Ø B (mm)	C (mm)	D (mm)	E (mm)	F (mm)
