# V120 V120-D V125 V125-D 

## DESCRIPTION

Series of all metal low profile mounts with one or two cushions, working in compression only, permitting high dynamic overloads (using a load distribution plate). Mounts can be fixed to floor.

Made of cups welded on a steel base with one or two stainless steel cushions (inox 18/8).
The steel parts are painted to protect against corrosion.

## APPLICATIONS

These mounts are designed for :

- suspension of presses;
- suspension of machine-tools which do not need levelling;
- suspension of transformers, diesel engines;
- suspension of rotating machines operating :
> 2500 rpm : V120 and V125;
> 2000 rpm : V120-D and V125-D.

## DIMENSIONS

## OPERATING CHARACTERISTICS

- Maximum permitted excitation at natural frequency of suspension :

V120 and V125: $\quad \pm 0.3 \mathrm{~mm}$;
V120-D and V125-D : $\pm 0.4 \mathrm{~mm}$.

- Natural frequencies for this amplitude :

$$
\text { - Axial } \quad\left\{\begin{array}{l}
\text { V120 and V125: } 15 \text { to } 20 \mathrm{~Hz} ; \\
\text { V120-D and V125-D:13 to } 18 \mathrm{~Hz} .
\end{array}\right.
$$

- Amplification factor at resonance : < 5 .
- Operating temperature : $-70^{\circ} \mathrm{C}$ to $+300^{\circ} \mathrm{C}$.
